PROFESSIONAL SUMMARY

Results-driven Full-Stack Software Engineer with hands-on experience delivering end-to-end web applications and mobile solutions. Proficient in React, Node.js, Express.js, and MongoDB, with a strong foundation in both frontend and backend development. Currently completing a B.Tech in Electrical/Electronics Technology at FUT Minna, bringing a unique perspective that bridges hardware systems and modern software engineering. Passionate about building scalable, user-centred digital products tailored to the Nigerian tech landscape.

PROFESSIONAL EXPERIENCE

Backend Development Intern

2024 – 2025

Trueminds Innovations Ltd — Minna, Nigeria

- Contributed to backend development using Node.js and Express.js within an agile team environment.
- Built and tested RESTful API endpoints integrated with MongoDB for data persistence.
- Set up MongoDB Atlas cloud database and resolved connectivity issues for production deployment.
- Generated technical documentation and pushed codebase to GitHub for team collaboration.
- Gained practical experience in full-stack JavaScript development within a professional setting.

SELECTED PROJECTS

Personal Portfolio Website

samuelboman.vercel.app

Technologies: Node.js, Express.js, EJS, CSS3, Vercel

A full-stack portfolio website built with Node.js and Express, using EJS templating for dynamic page rendering. Features responsive design, hamburger mobile navigation, dynamic routing, and is deployed live on Vercel with a custom domain.

Food Delivery Mobile App

github.com/Samuelboman

Technologies: React, Node.js, Express.js, MongoDB, Socket.IO, Paystack

A Nigerian-focused food delivery application addressing pain points in existing platforms. Features real-time order tracking via Socket.IO, Paystack payment integration, restaurant management, and a React frontend backed by a Node.js/MongoDB API.

Chuck Norris API App

github.com/Samuelboman/simple-API-with-chuck-norris

Technologies: JavaScript, REST API, HTML5, CSS3

A web app that fetches and displays random Chuck Norris jokes via a public REST API. Demonstrates API consumption, asynchronous JavaScript, and clean UI design with dynamic content rendering.

Signup Form UI

github.com/Samuelboman/signup-form

Technologies: HTML5, CSS3, JavaScript

A clean, responsive signup form featuring modern UI patterns, client-side form validation, and accessible semantic markup. Built with pure HTML and CSS.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), HTML5, CSS3, C (Basic), Python (Basic)
Frontend:	React.js, React Native, EJS Templates, Responsive Design, REST API Integration
Backend:	Node.js, Express.js, MongoDB / Atlas, REST APIs, Socket.IO
Tools & DevOps:	Git, GitHub, Vercel, VS Code, Postman, Linux (Basic)
Payments & Integrations:	Paystack, Socket.IO real-time communication

EDUCATION

B.Tech — Industrial Technology (Electrical/Electronics Option)	2021 – July 2026
<i>Federal University of Technology, Minna (FUT Minna) — Niger State, Nigeria</i>
